

How to use the artifact:

The artifact is based on Google Colab computing engine. To run a certain version of the artifact, you can follow below steps:

- 1- Sign-in to Google Colab using a google account
- 2- Upload all the dependent module to Google Colab "Files"

- 3- Open one of the artifact versions on Google Colab
- 4- Mount your google drive which contains a folder named "Colab Notebooks" and its subfolder named "SIT723". "SIT723" folder should be place where you save/store all the datasets

For example:

Colab Notebooks/SIT723/x_train.csv

Colab Notebooks/SIT723/y_train.csv

...

- 5- Now, run the artifact in the top-down order to avoid missing any dependent python packages

NOTE:

The process of running the artifact may vary based on the internet speed, the fluctuation of GPU available, and the Google account type.
